Professional Summary

Motivated Computer Science Engineering student with practical experience in machine learning, data analytics, and web development.

Proficient in Python and modern technologies with strong problem-solving and collaboration skills.

Seeking a challenging entry-level opportunity to apply technical knowledge and continuously learn.

Skills Summary

- Programming:** Python, C, C++, JavaScript, SQL
- Machine Learning:** Supervised Learning, Data Preprocessing, Feature Engineering, Model Evaluation
- Data Analytics:** NumPy, Pandas, scikit-learn, Excel, Power BI (Beginner)
- Web Development:** HTML, CSS, JavaScript, Flask, Django, Tkinter, Responsive Web Design, JSON Data Handling
- Tools & Technologies:** Git, GitHub, Docker (Basics), Linux Environment, MySQL, PostgreSQL, SQLite

Internship Experience

Machine Learning Intern | Shiash Info

Aug 2024 – Nov 2024

- Built an image classification model using supervised learning techniques.
- Performed data preprocessing, feature extraction, and model evaluation using Python and scikit-learn.

AI Intern | Plasmid

Mar 2024 – May 2024

- Developed a spam news detection system using machine learning algorithms.
- Applied text preprocessing and classification techniques to improve prediction accuracy.

Web Development Intern | HDLC

Jun 2025 – Jul 2025

- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript.
- Implemented web forms and improved user interface usability.

Projects

Image Classification Using Machine Learning

Aug 2024 – Oct 2024

Technologies: Python, scikit-learn, NumPy

- Developed a supervised machine learning model to classify images based on extracted features.
- Performed data preprocessing, feature extraction, and model evaluation to improve classification accuracy

Tourist Budget Planner

Jan 2025 – May 2025

Technologies: Python, Tkinter, JSON

- Designed and implemented an interactive desktop application to suggest travel destinations based on user budget and preference.
- Integrated Tkinter GUI with JSON data handling for efficient storage and retrieval of trip details.

FARM-AI: Smart Agriculture System

Jul 2025 – Nov 2025

Technologies: Python, Machine Learning, Web Technologies

- Developed an AI-based agriculture recommendation system using soil type, weather conditions, location, and land area.
- Applied machine learning techniques to improve crop recommendation, yield prediction, and fertilizer suggestions.
- Built a responsive web application with text and voice support to enhance accessibility for farmers.

Education

Bachelor of Technology – Computer Science and Engineering (AI & Data Science)

Hindustan Institute of Technology and Science (HITS), Chennai

Aug 2023 – May 2027 | CGPA: 8.64 / 10

Certificates

- AI and ML Workshop – AiiTE Academy
- Digital Marketing – TechNoHack
- Networking Basics– Cisco
- Cybersecurity – Cisco
- Intership Commom Aptitube Test – iCAT
- Cybersecurity – Cisco
- Google Data Analytics – Excel Skills – Google
